

C-310 PCB Separator

Features

1. All PC boards with a V-cut are suitable for this machine.
2. Cutting by machine can reduce stress and prevent the welding point from cracking.
3. The distance between the upper and lower cutters can be adjusted with a minimum of 0.03mm, which can solve the problem of the depth of the V-cut.
4. Adopting auto program-controlled electric appliance, it works accurately and it is very easy to operate and maintain.
5. The photoelectric controller imported from Japan is very secure.
6. Its cutters are original cutters imported from Western Germany. They are very durable.
7. We can produce special machines for PC boards of special specs.

Specifications

1. Power: AC110V/220V, 60/50HZ
2. Dimension: 690 x 430 x 460mm
3. Weight: 39kg
