Machine Introduction

Adopts 32-bit intelligent control system, LCD display can be switched into Chinese and English. It can store hundreds of information and call it at any time, it's labor saving time improving and increases production efficiency. Mainly used for electronic cable, silicone cable, teflon cable, fiberglass cable, insulation cable, sheath cable, etc. Fully automatic cutting, stripping, half-stripping, medium-stripping and twisting functions are achieved in one time, and it can change the wire size quickly. This machine is mainly used in electronics, electrical appliances, toys, automobile and motorcycle part and other industries.

Applicative diameter: $\leq 4\text{mm}$

Capacity: 1

Cutting length: 0.1-9999.9mm

Front end stripping: 0-35mm

Back end stripping: 0-60mm

Productivity: 2000-3500pcs/h

Cutting accuracy: $0.002 \times L$

Middle stripping: 15times
