

Multi-blade aluminum PCB V-CUT separator HEDA-801K

Application

Used for aluminum PCB V-CUT separate, the machine adopt the three set blades to low the stress during the cut.

Feature

- Small capacity, High safety and easy to operate.
- Adopt the multi-blade style. It is totally three steps to cut and minimize the stress. The best machine for minimizing the stress still now.
- Blade materials imported from Japan with long lifetime and high strength.
- Speed is adjusted and could meet the mass production.

Parameter

Power: 220V/AC 50Hz 90W

Size: L550*W550*H370MM (Standard size)

Weight: 60KG

PCB Height: 0.8MM-3.5MM PCB board

PCB materials required: Could cut aluminum, Copper, FR 4 PCB

PCB length: No limitation. (could customized according to customer demand)
