

N O	Item	Specification
1	PCB Separator YS-FB310 	<ul style="list-style-type: none"> •Desktop single working machine,speed reach 100mm/s, target speed 500mm/s. •Continuous cutting while load and unload •High quality shaft system makes it speed up and slow down faster.It decreases time ,improve productivity and make sure high accuracy •High quality hardware is to make sure high performance •All screws are covered to prevent dust,which can improve performance and machine life

Feather:

- 1.Motor:stepper motor
- 2.Main Axis:local or exported
- 3.Capability: 500mm/s
- 4.Drive system accuracy: $\pm 0.02\text{mm}$
- 5.Speed: Max 100mm/S (it depends on the pcb)
- 6.Resolution ratio: $\pm 0.01\text{mm}$
- 7.Working area: X、Y、Z/300*300*100mm,can be customized
- 8.Repeat accuracy: $<0.1\text{mm}$
- 9.Fix PCB: special or standard holding device
- 10.Load and unload method: by people
- 11.PCB thickness: 0.4mm-4mm
- 12.Safety set: machine emergency switch,main axis emergency switch,main axis motor hot enough and servo motor check
- 13.Main Axis Motor:
 - Power: 0.5kw
 - Max Speed: 60000 revolution/mins
 - Cold Method: wind
- 14.Machine size: 650*550*615mm
- 15.weight: 73KG
