

SCCI-02 Intelligent SMD Component counter with omission detection

Herebelow is a table showing differences between new intelligent counter and traditional one

Comparison point	Traditional counter	Intelligent counter
Automatic stop after work	No, need to push stop manually	yes
Buffer stop	No	Yes,would slow down when is finishing
Voice instruction and number off	No	Yes, finish alert
Error	No.	No.
Power	30W	80W
Speed	For 5000pcs small elements 30 seconds per plate	For 5000pcs small elements 15 seconds per plate
Speed Adjustment	3 levels	8 levels
Noise	Low	low
Counting scope	-99999 to 99999	-16 777 216 to 16 777 216
Printer port	yes	yes
Scanner port	yes	yes
Omission detection, optional	yes	yes
Clock, optional	yes	yes

Function:

1. accurate and quick detection of SMD components quantity
2. examine empty components--- omission detection

Product Specification

Power source	AC220/110, 50HZ, 25W
Counting scope	-16 777 216 to 16 777 216 pcs
Ourlook size	470 x 300 x 180 mm, LxWxH
Weight	10KG

Product Application

1. suitable for all SMD tape
2. SMD tape pulley suitable for all size
3. SMD tape pitch: 2, 4, 8, 10, 12, 16, 24, 32, 44, 56mm
4. SMD tape width: 8, 12, 16, 24, 32, 44, 56mm

Attention before usage

1. Make sure the voltage conforms to your facility
2. Made sure earth wire is well grounded.
