

Unloader LY-250G-D

Model	Specification	
Unloader (LY-250G-D) 	Board Size	W50*L50(MIN)----- W250*L330(MAX)
	Transmission Height	920±30mm
	Step Selection	10,20,30,40mm
	Magazine Size	L355*W320*565mm
	Power	1P AC220V,50HZ
	Machine Dimension	L1700*W780*H1200 ±30mm (with alarming light)
Description		
Controlled by PLC and Panel, ensuring a stable and reliable work		
Strong commonality, allowing to use a standard magazine rack		
Lift up-down mechanism according to the thickness of PCB		
Armed with the SMEMA interface which can connect with other machines online.		
Specialized aluminium guide rail and plastic roller chain.		
Taiwan-made 90w step motor driver adopts the ball screw to control the rise and down of magazines.		
Automatic magazine change-over.		
Pneumatic clamping structure.		
Mistubishi PLC programmable.
